Art Unit: 2173

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1 – 20, 24, drawn to the synchronization of a visual display to an audio playback, classified in class 345, subclass <sup>716</sup>~~715~~, class 715, subclass 500.1;

RB

II. Claims 21 - 23, drawn to placement of timestamps into analyzed audio information, classified in class 345, subclasses 727, 716.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I as presented has separate utility, such as its synchronizing being conducted not necessarily by using the details of invention II's analysis of audio. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different

---

classification, because the search required for Group I is not required for Group II, and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. Thorne on 9 September 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2173

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Raymond J. Bayerl whose telephone number is (703) 305-9789 through the month of October 2004 and (571) 272-4045 thereafter. The examiner can normally be reached on M - F from 10:00 AM to 5:00 PM ET.

8. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Cabeca, can be reached on (703) 308-3116 through the month of October 2004 and (571) 272-4048 thereafter. All patent application related correspondence transmitted by FAX **must be directed** to the central FAX number (703) 872-9306.

9. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-3900.
